

Art Pottery 1

---

I make art because I think it's the deepest form of communication and the best way to get through to the people.

I've wanted to be an artist, from a very young age. I've never taken an art class before. This semester I took Art Pottery 1 and I'm really happy to have had this opportunity.

I chose a crab for the Mystic Seaport project because I like how the crab is ruled by the moon in the astrology and in the zodiac signs.\*

I created the crab with white clay and I painted it with acrylic paint. On the surface I used various shades of red mixed with black, brown and yellow. On the bottom I used yellow with a little of orange and white.

Finally I made the shell shiny.
